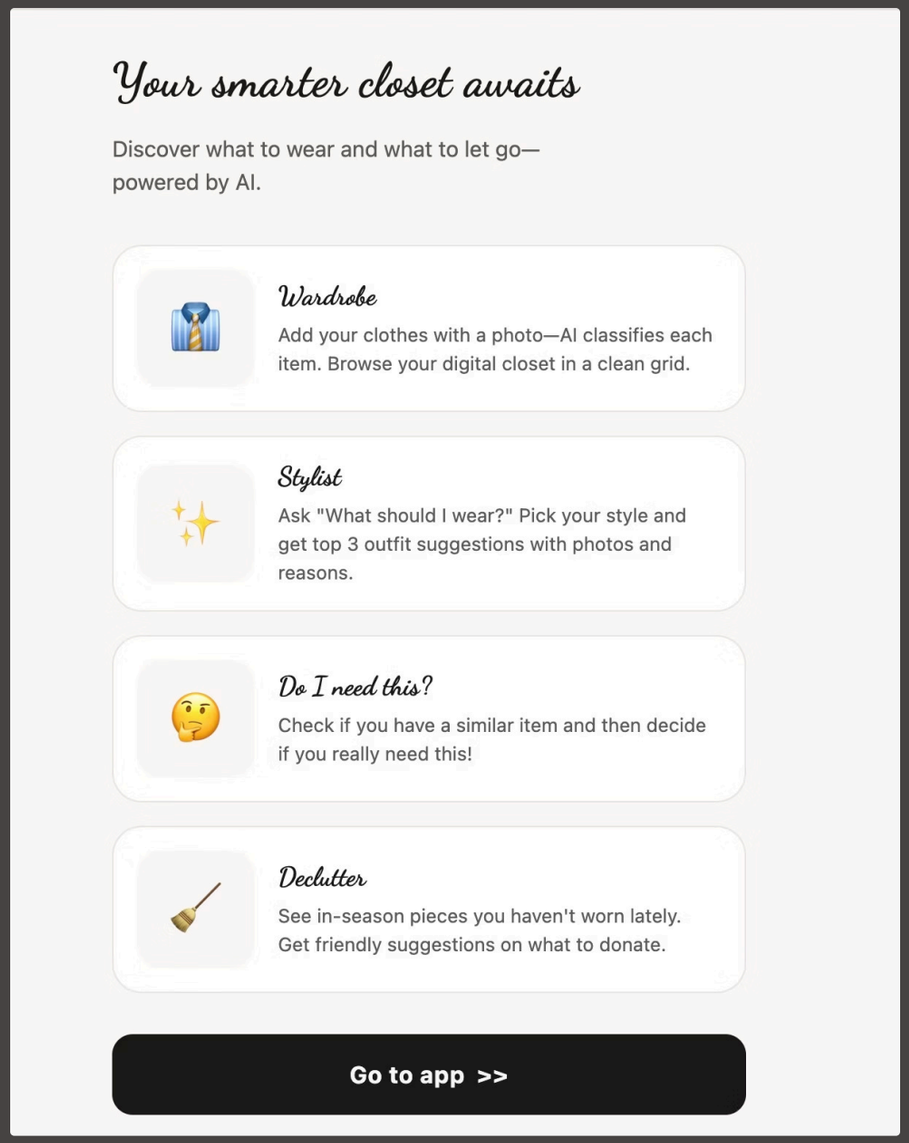
Neural Threads

Sustainable wardrobe management powered by intelligent agents

PROBLEM

The Wardrobe Challenge



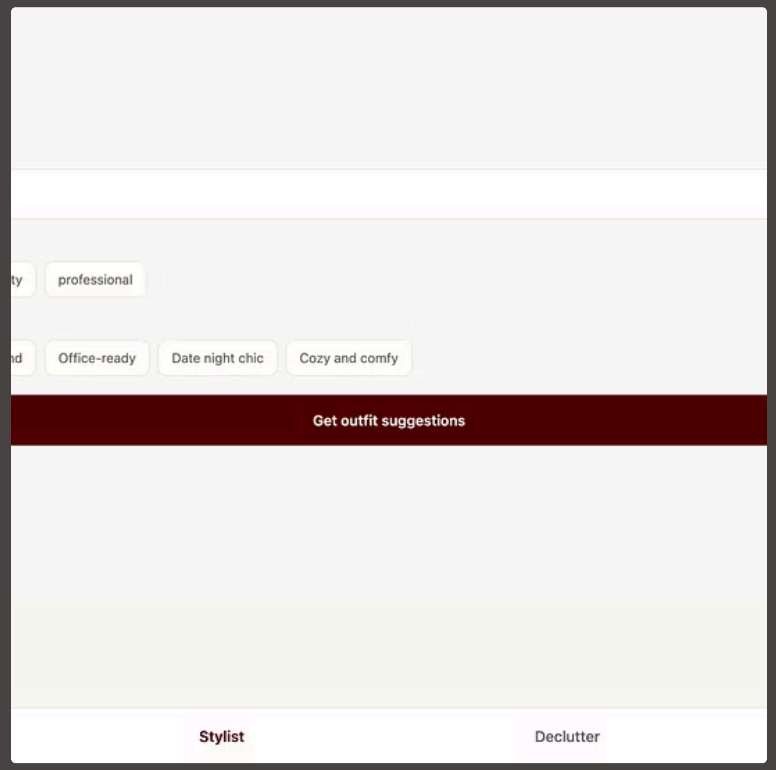
Daily Struggles

- Difficulty choosing outfits that match mood and occasion
- Unused clothes taking up valuable space
- Lack of sustainable wardrobe practices
- No system to track and optimize clothing usage

Made with GAMMA

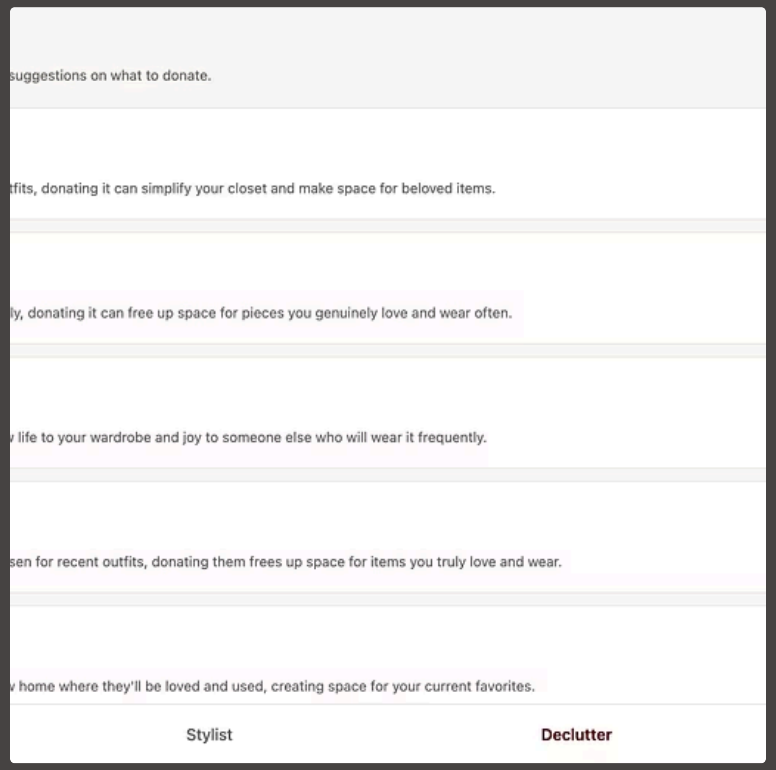
SOLUTION

Meet Your AI Stylists



Miranda - Stylish Agent

Curates personalized outfit suggestions based on your mood, preferences, and wardrobe inventory.



Monica - Declutter Agent

Autonomously identifies unused items and recommends sustainable decluttering decisions.

Made with GAMMA

How It Works

Capture

Upload clothing images converted to JSON via Gemini Vision API

Analyze

AI agents communicate A2A style to understand preferences and usage patterns

Suggest

Receive top 3 outfit combinations tailored to your mood

Optimize

Declutter unused items and prevent duplicate purchases

Made with GAMMA

Key Features

Smart Styling

Mood-based outfit recommendations with top 3 suggestions

Outfit Library

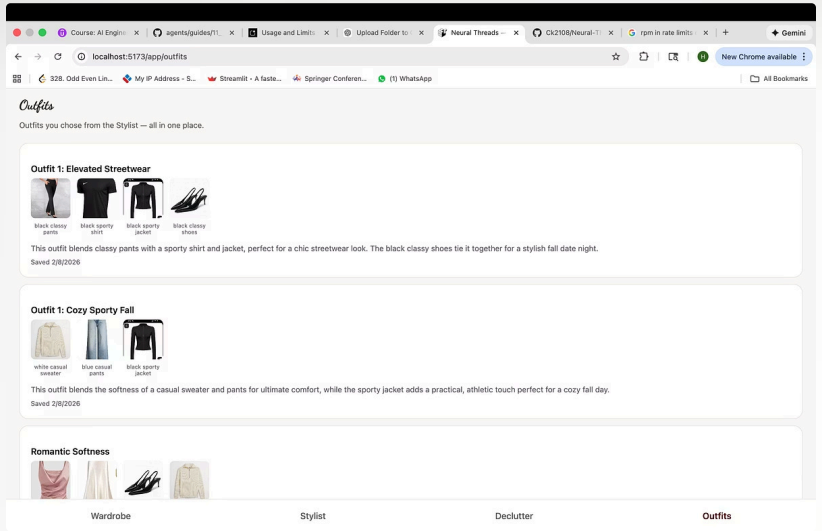
Save favorite combinations for future reference

Duplicate Detection

Cross-check wardrobe before new purchases

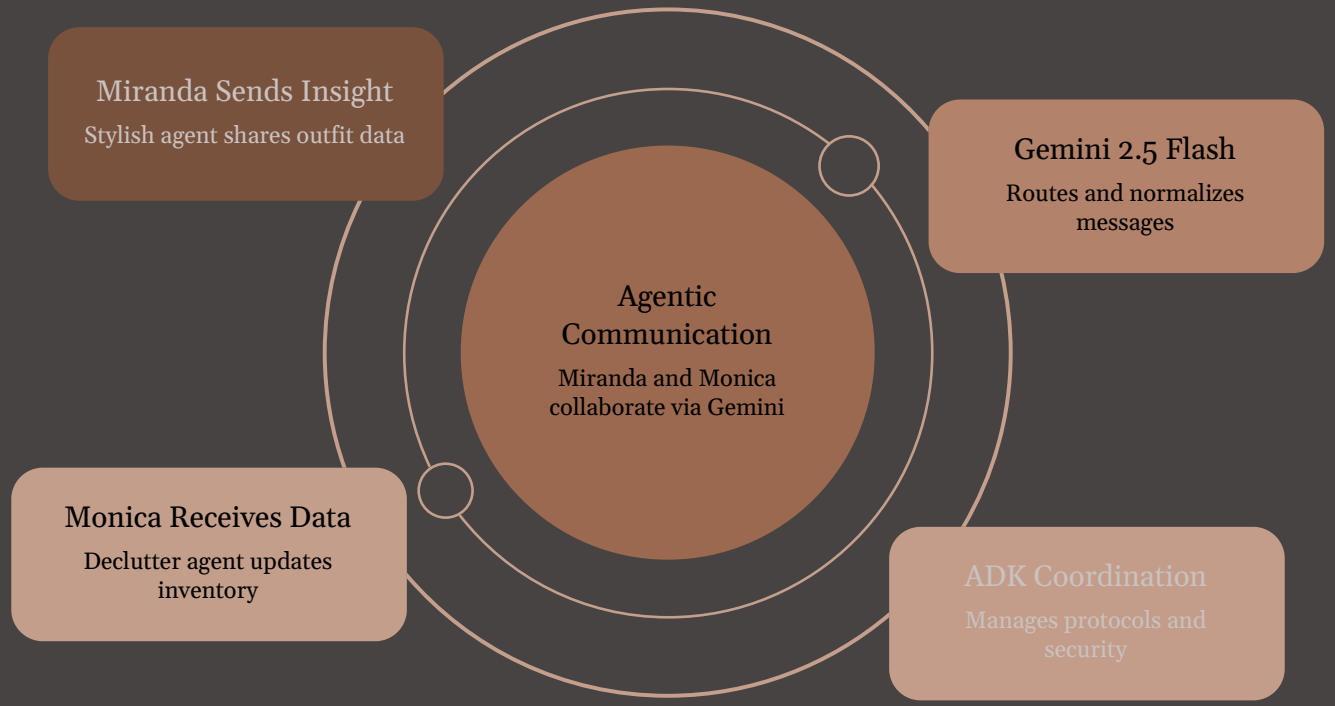
Auto Declutter

Identify rarely-worn items for sustainable removal



Made with GAMMA

Agentic Architecture



Powered by Gemini

Two specialized agents collaborate using Gemini 2.5 Flash as the primary LLM, built with Google's Agent Development Kit (ADK).

A2A Communication: Agents share insights about wardrobe usage, styling preferences, and sustainability goals in real-time.

TECH STACK

Built With Modern Tools

Frontend

TypeScript + React for responsive UI

Backend

FastAPI for high-performance API

AI Layer

Gemini 2.5 Flash + Vision API + Google ADK

Deployment

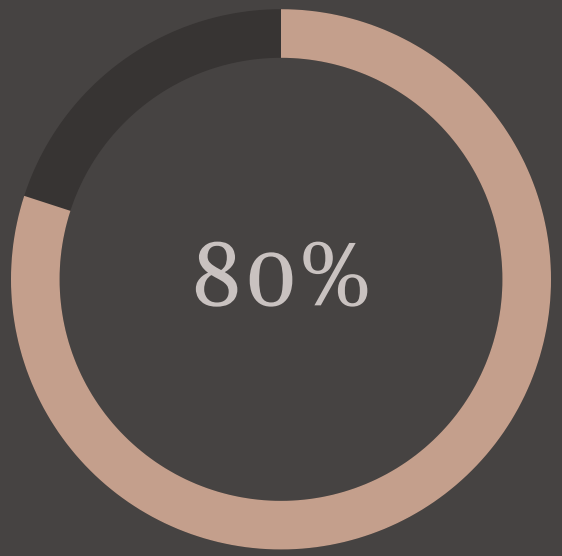
Digital Ocean Droplet / Railway

Made with GAMMA

Sustainability Impact

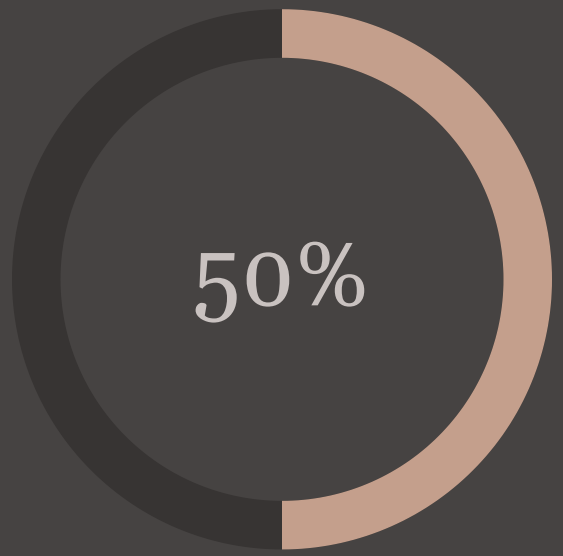
Wardrobe Visibility

Complete inventory prevents duplicate purchases



Usage Optimization

Maximize wear from existing clothes



Waste Reduction

Smart decluttering promotes donation over disposal

Made with GAMMA

User Journey

From Chaos to Clarity

01

Upload wardrobe photos

Gemini Vision converts images to structured JSON

02

Set your mood & preferences

Miranda analyzes and suggests 3 perfect outfits

03

Save favorites

Store winning combinations in Outfits folder

04

Declutter sustainably

Monica identifies unused items for removal
